

Foreword

This document has been made from the Rootes Sunbeam Alpine Series I, II, III, IV and V Parts List dated June 1968, Publication No. 6600992.

It has been adapted for use with the Sunbeam Tiger 260 and 289 Parts List Supplement dated January 1967, Publication No. 6601334. Together they provide the most accurate and comprehensive build list of parts for both the Mk I and Mk. II Tigers.

The changes were made to simplify the document by omitting sections which apply to the Alpine engine, transmission, carburetor, radiator, etc. which were changed on the Tiger. Sections referring to parts used exclusively on Series I, II and III Alpines were also excluded since the Tiger was based on the Series IV. The index by part number was also omitted.

Rootes constantly changed the parts lists based on the release of new models, engineering changes to deal with problems and errors. Changes were covered by several methods; monthly Amendment Sheets were issued, revised pages which were supposed to replace pages in the list were issued at three months intervals and less frequently a completely new list. Original documents have colored lines in the page margins. The Tiger 260 Supplementary Parts List on the TU website is Publication No. 6601131, dated January 1965, and covers B947XXX Mk I Tigers only.

The Owners Manual was delivered with the car and the Workshop Manual was available from Dealers, but the Parts Lists were generally for the Dealer's use and not generally made available to the public.
